

Registrando um banco de dados no aplicativo "DBeaver"

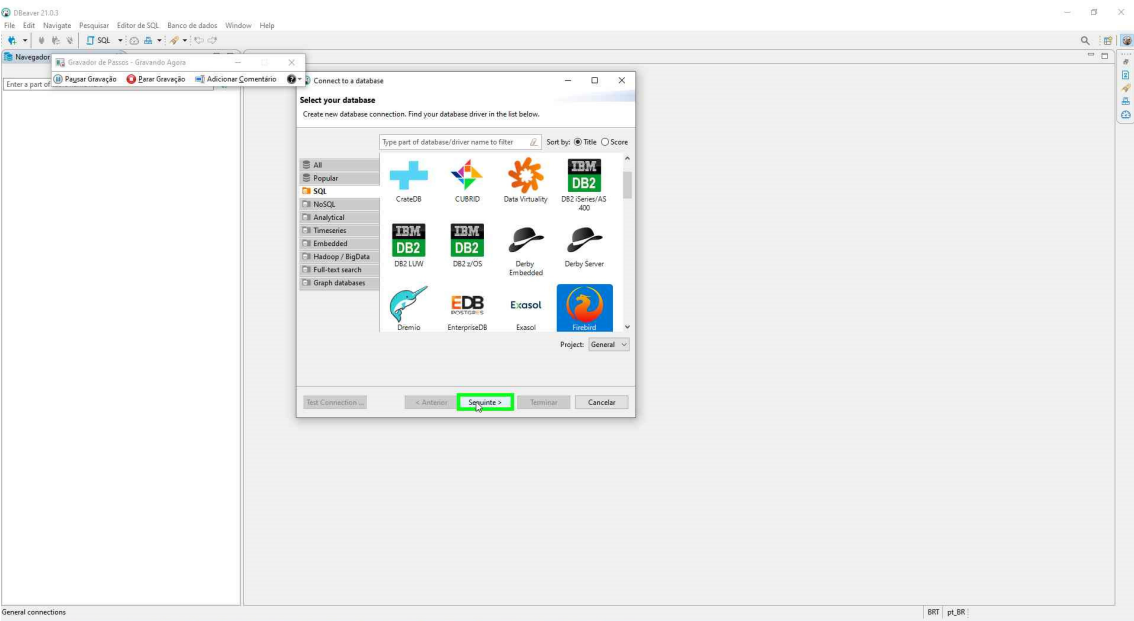

Clique com o botão esquerdo do mouse em "Nova Conexão de Bancos (botão de divisão)" em "DBeaver 21.0.3"

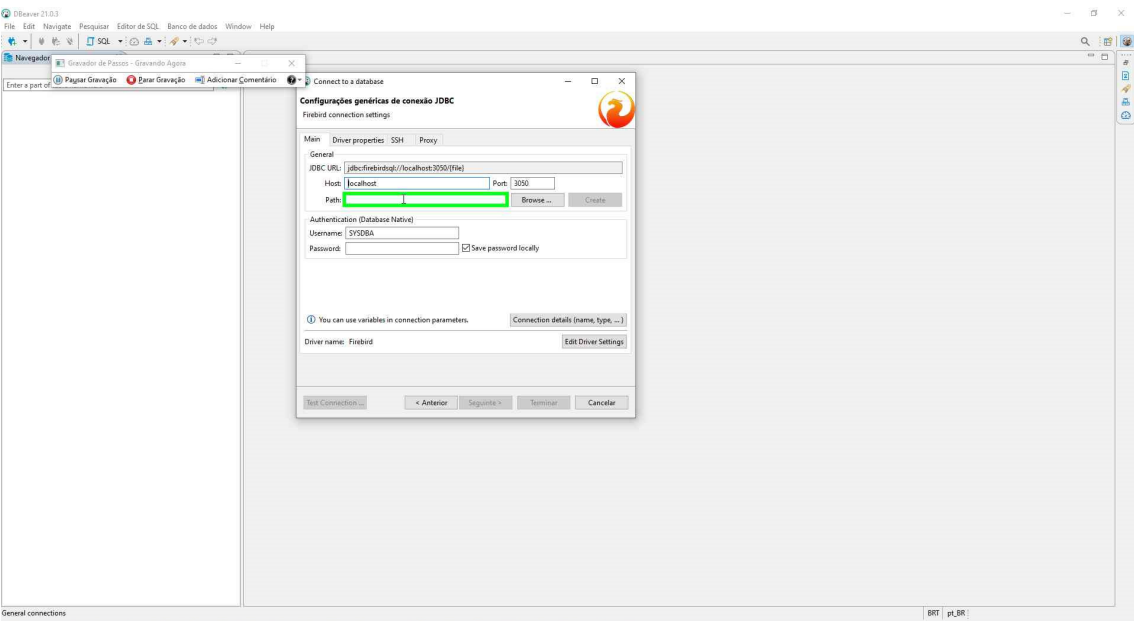

Clique com o botão esquerdo do mouse em "Connect to a database"

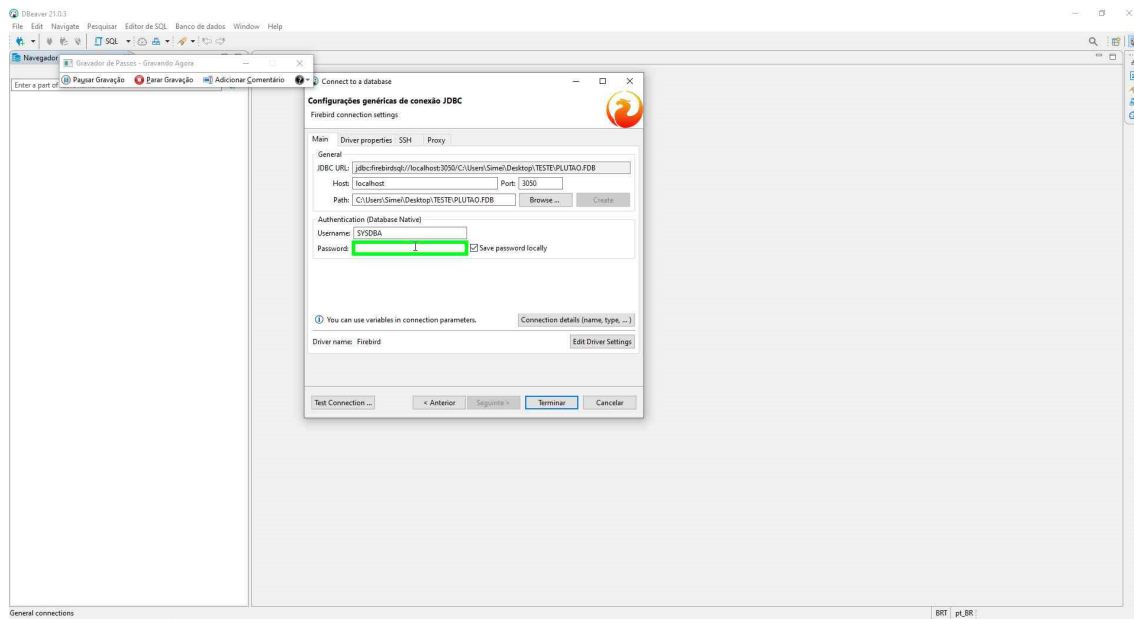

Selecione o tipo do banco de dados "Firebird" e clique em "Seguinte":

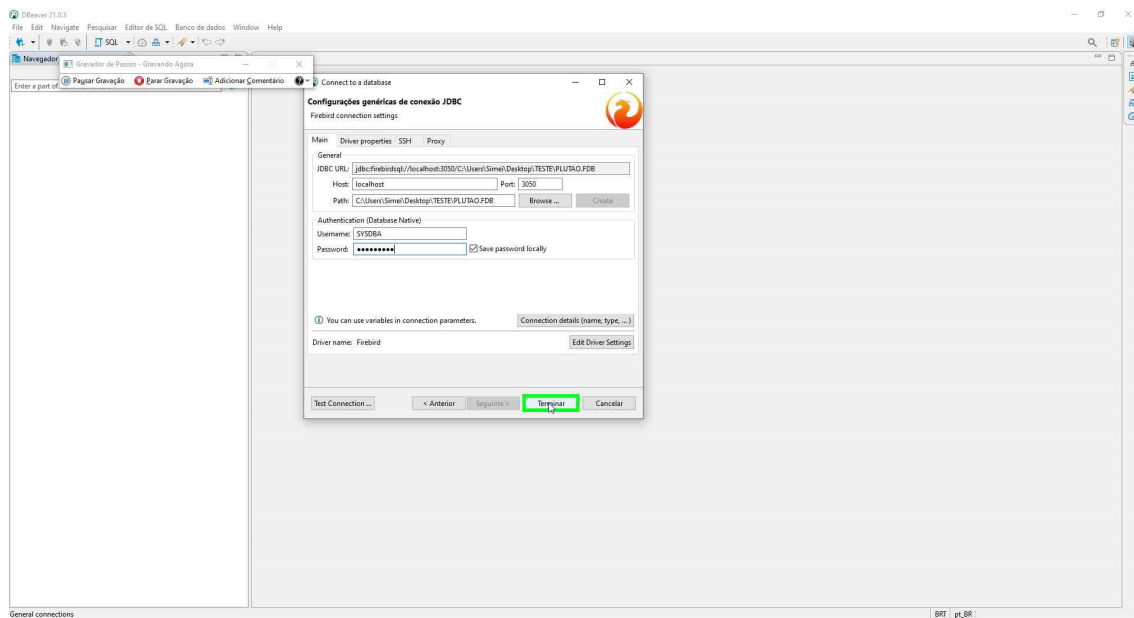

No campo "Path", selecione o diretório do banco de dados:

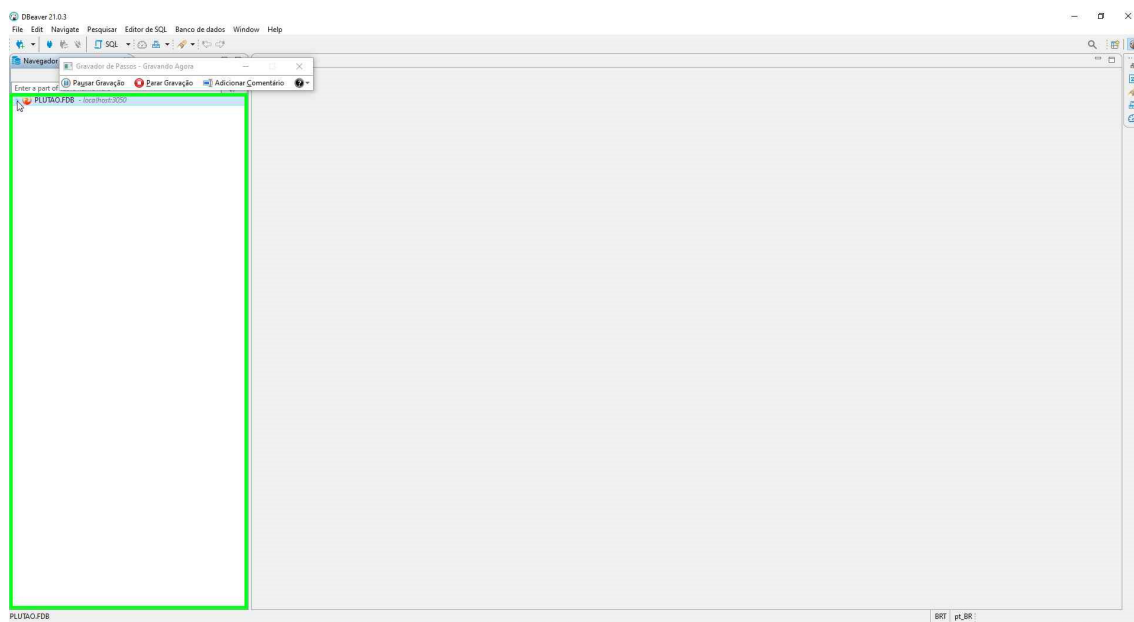

No campo “Senha” digite “masterkey”:

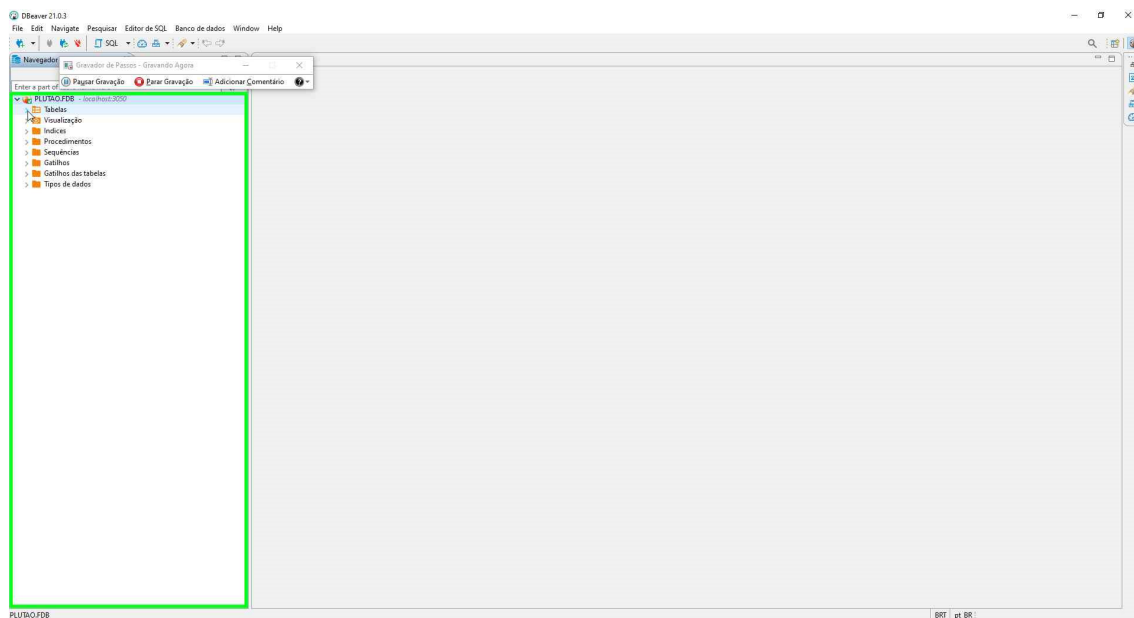

Clique em “Terminar”

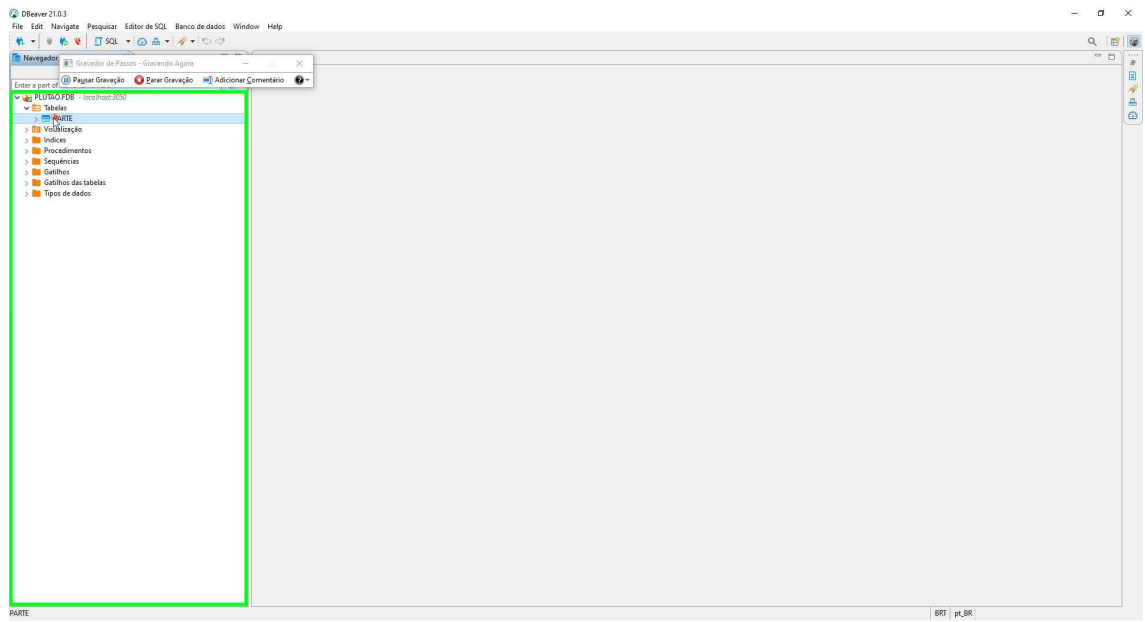

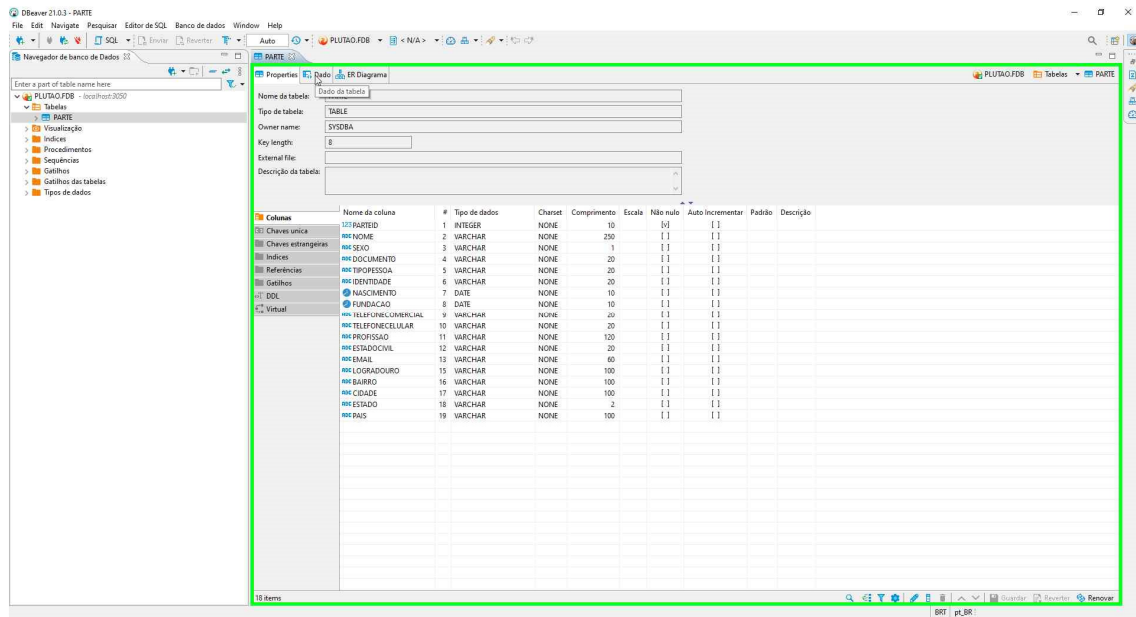

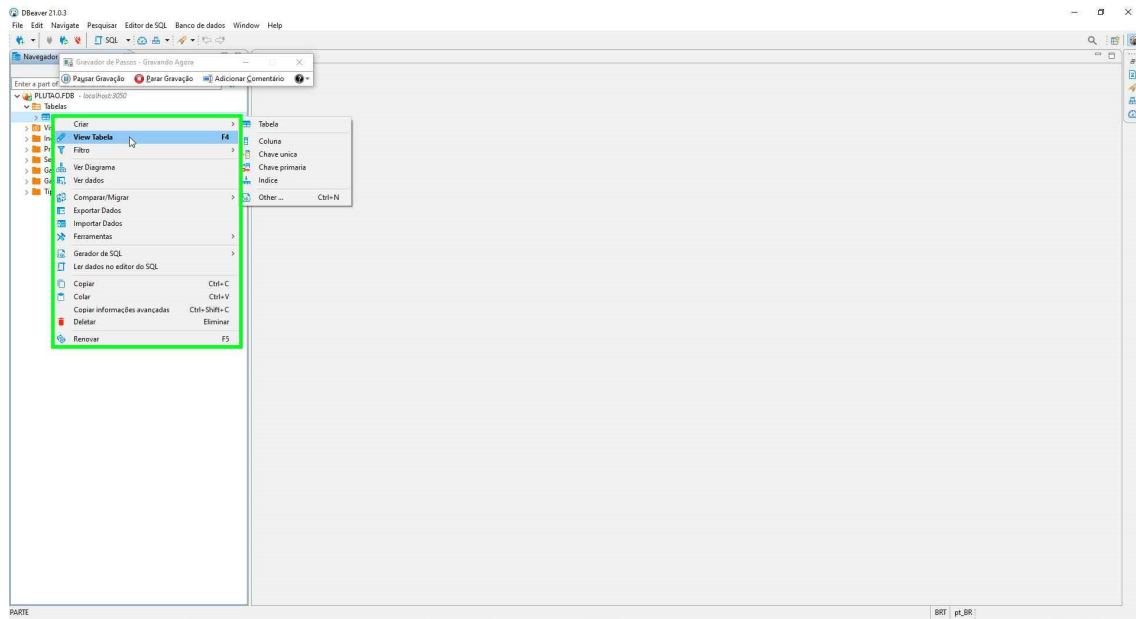

Pronto, o banco de dados está registrado!

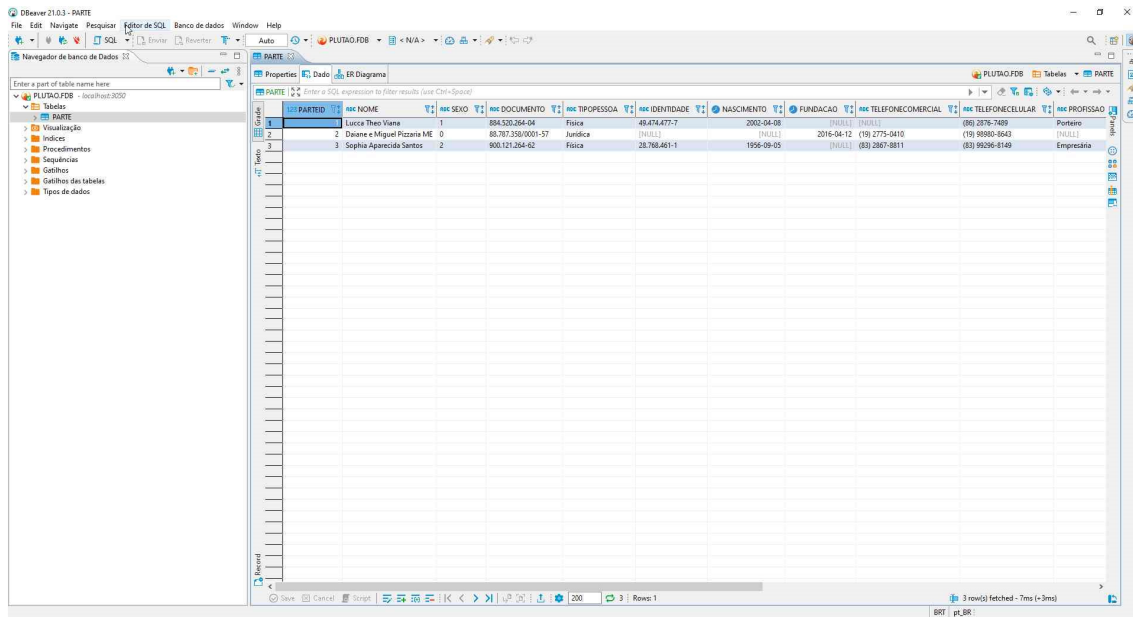

Abra o banco e navegue até o diretório “Tabelas” e abra a tabela conforme imagens abaixo:

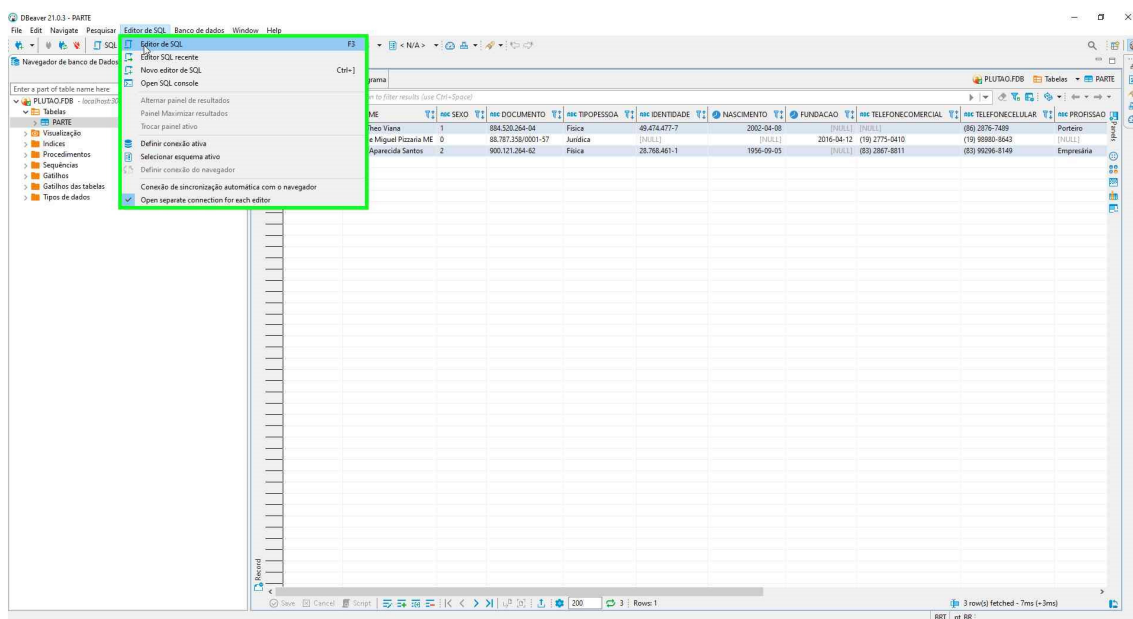

Para abrir o Editor de SQL acesse pelo atalho "F3" ou pelo diretório, conforme imagens abaixo:

Para executar o comando, clique no botão "Executar" conforme imagem abaixo ou clique em "Ctrl+Enter"
